

Project Design Phase-IIb

Solution Requirements (Functional & Non –Functional)

Date	02 November 2022
Team ID	B8-2A4E
Project Name	Smart Fashion Recommender Application
Maximum marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirements	Description
FR-1	Registration	Registration requires few personal details of the users which includes mobile number and email address.
FR-2	Login	Users can only log in using the userid and the password with which they have registered.
FR-3	Delivery information	The delivery information is shared to the users via email and phone number.
FR-4	Help	To make the usability simple, a chat bot is integrated with the application.

Non-Functional Requirements:

Following are the Non-Functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Feasibility	The integration of the chat bot results in a user-friendly interface.
NFR-2	Security	Connection like HTTPS which are secured is used for transmitting requests and responses
NFR-3	Reliability	To avoid the unexpected glitch, the system should handle the excepted or the unexpected errors.
NFR-4	Performance	The system will handle multiplerequests and generate accurate response despite any obstacles.
NFR-5	Availability	It is a cloud based web application and anyone can use it.
NFR-6	Scalability	It results in quick request and response time, highthroughput, enough network resources and soon.
